

dKart[®] Office ENC Production & Maintenance

The complete solution for ENC production and maintenance

The dKart ENC Production & maintenance suite of tools and databases provide an effective, complete and comprehensive, easy to use, technology to produce and maintain IHO S-57 products. Built in on-the-fly quality assurance and control procedures further enrich and ensure the highest quality for the end products.

dKart Office system has a modular structure, the configuration of which can be easily adapted for the specific needs of end users.

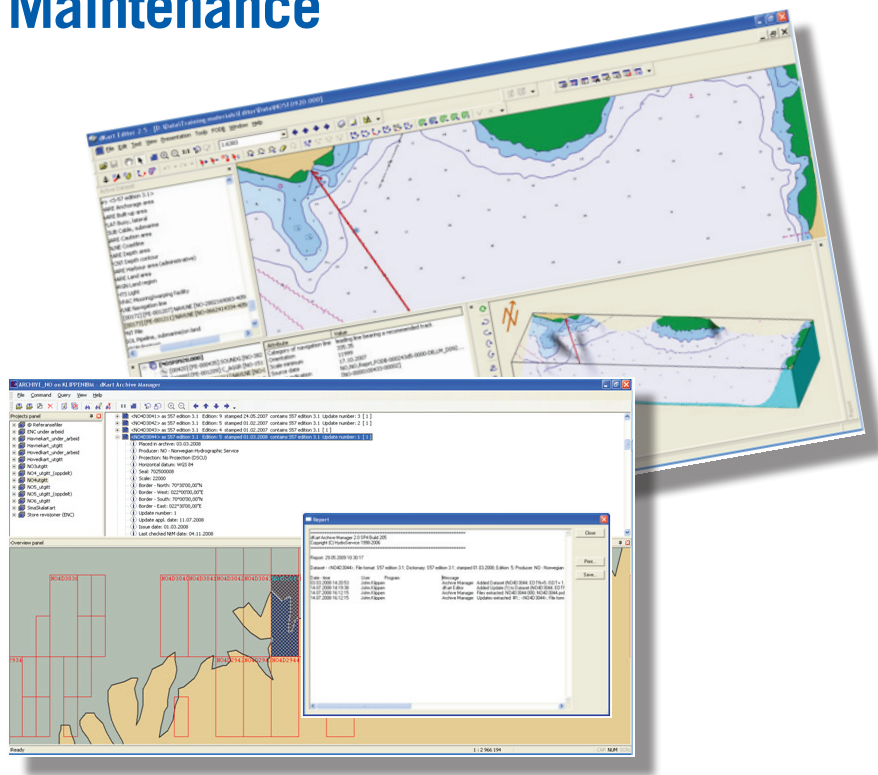

By combining different modules/programs into a particular configuration it is possible to select the functionality to suite any specific need. At the same time the overall functionality can always be upgraded by adding new modules/components to the System as it becomes necessary.

dKart Editor & dKart Archive facilitates the production and maintenance of electronic charts (S-57 ENC, AML, Inland ENC). The same system supplemented with dKart Feature Object Database software and database allow for administration, maintenance and integration of objects in a one feature - one time - multiple products for scale independent objects.

- :: Support all S-57 versions/edition and conversion between S-57 editions
- :: Import/Export to from misc. formats
- :: On-fly quality control and validation (IHO S-58)
- :: Automatic update file creation
- :: Activity and Traceability logging
- :: User rights control
- :: Backup/restore routines
- :: Digital catalogue integrated
- :: Maintenance based on Source messages
- :: Maintenance based on Notice to Mariners

dKart Office ENC Production & Maintenance

dKart Editor - production, QC/validation and maintenance of ENCs (S57/3.x) and other chart products (AML, Inland ENC, etc.).

dKart Publisher – is a fully equipped production tool for making and maintaining complete digital paper charts based on S-57 data. Full support for a Print-On-Demand infrastructure.

dKart Archive is a system of centralized cartographic data storage, where data is stored throughout all stages of production, maintenance and distribution.

dKart FODB is a hydrographic database used for centralized storage of scale-independent objects (enhanced “NavAids/Lights database”).

dKart NtM DB is a system for centralized storage of Notices to Mariners. The system comprises database and managing application. Depending upon the tasks and configuration of HO, can be delivered either as a stand-alone solution (e.g. automation of updating or web-server solution) or as a part of NtM Production System.

dKart SMDB is a system for centralized storage of source (NtM) messages. The system comprises database and managing application. Depending upon the tasks and configuration of HO, can be delivered either as a stand-alone solution (e.g. automation of updating) or as a part of NtM Production System.

dKart Catalogue is a host system of chart catalogues and nautical publications.

dKart Product Generator – ENC packager for auto creating an exchange set of user-defined structure

dKart Exchange Set Verifier – S-57 Exchange set verifier that covers both un-encrypted and encrypted exchange sets (encryption based on IHO Data protection Scheme; S-63)

SUPPORTED DATA FORMATS:

Import/Load & Export/Save:
S-57 (All Editions)
S-57 AML 1.0 & 2.1
Inland ENC
GML 2.0, 3.1/3.2
DGN
DXF
Shape
XYZ (ASCII/Binary)

SUPPORTED RASTER FORMATS:

dKart Raster format
GeoTiff / Tiff
BMP
BSB
JPG/JPEG
PCX
GIF
MAP

SUPPORTED STANDARDS:

IHO S-52
IHO S-57
IHO S-58
IHO S-60
IHO S-62
IHO S-63
ISO 8211
GML 2.0 & 3.2
PCX
